

Hand-made appeal

Not everything's here today, gone tomorrow – bespoke wood cabinetry optimises your available space and reflects enduring good taste

Quick and cheap aren't really the first words you want to hear when choosing cabinetry for your interiors. A far better option is a professional, tailored cabinetry solution that goes beyond the ready-made to add to the refinement of your home.

And this is where RH Cabinetmakers really comes into its own, says managing director Rob Hendrickx.

"Our experienced team designs, crafts and installs bespoke cabinetry pieces for the finest homes across Auckland," he says. "We specialise in hand-made quality

kitchens, bathroom vanities, laundries, furniture, shelving, counters and bars."

Unlike many cabinet firms that steer you towards their existing sizes and styles, RH Cabinetmakers designs refined wood cabinetry that fits your room's dimensions like a glove. This means storage just where you need it with no wasted dead space.

"True master trades and craftspeople are a dying breed in a world full of cheap imports. But, if you're looking for more, then our skilled team will provide it."

Excellent product knowledge, friendly

service, and a quality guarantee are all part of the professional cabinetmaker's appeal.
