

Carpet

Why choose carpet?

Carpet offers you so much in terms of comfort, style, insulation and durability. Available in almost any colour, texture or pattern, carpet is one of the defining aspects when creating the overall look and feel of your home. It can enhance a room with casual simplicity, or create a showcase for formal elegance. Carpet is easy to maintain – simply keep clean with regular vacuuming and a professional cleaning every 12-18 months. With a huge variety of textures and features, your local Flooring First expert can help you choose the carpet that is right for you, your family, and your budget.

Wool, or synthetic fibres?

Wool carpet undoubtedly offers you a luxurious feel underfoot. Wool is hardwearing and maintains its appearance over the years. Wool is also a natural insulator and has flame-retardant properties.

Synthetic carpets offer many advantages to the consumer, and come in a huge variety of colours and textures. Synthetic carpets tend to be extremely durable and many now incorporate high percentages of recycled materials, making them an eco-friendly choice as well. Due to the nature of the dyeing process, synthetic carpets offer excellent fade and stain resistance. They provide a safe option for allergy sufferers, too.

For more detailed information about the variety of natural and synthetic carpets available to you, contact your nearest Flooring First store for expert advice.
