

| SALES | DESIGN | INSTALL | CONSULTANCY | TRAINING |

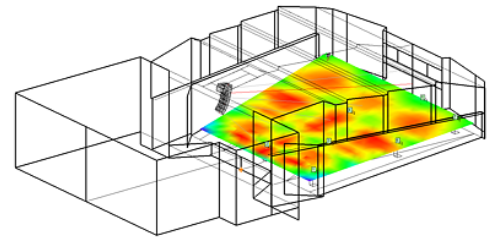

Audio Workshop is owned and managed by Matt Chapman, based in Wellington New Zealand. Matt has extensive audio industry experience spanning 20 years.

Matt has worked in the AV industry and then for two of the top Pro Audio wholesale/importers, as a regional sales manager, designer and technical support person. Matt has represented some of the best brands in the world including JBL, Crown, AKG, Soundcraft, BSS audio, DBX, Lexicon, Shure and QSC.

Audio workshop offers a comprehensive design service for installation projects.

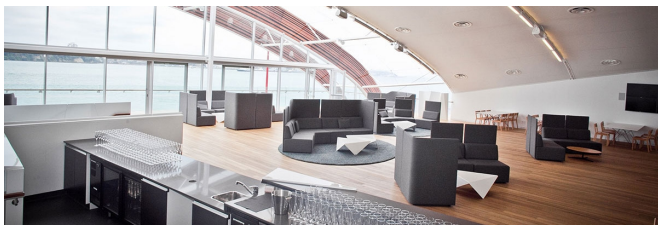

The first and most important step is the consultation where we get to understand your needs and the functions the system needs to provide. From there the design process starts.

Gone are the days of walking in to a space and taking your best guess. With our experience and expertise we use the industry standard tools and technology to ensure you have proof of concept before the first cable is run. We use a software programme called EASE. EASE is an internationally used tool in the audio and acoustic industry.

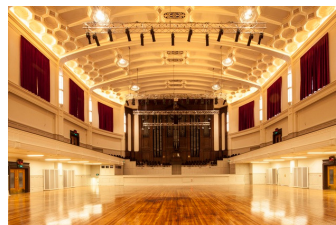

This software enables us to build your room or venue in 3D. We are able to add wall, ceiling and floor surfaces, or tell the programme the acoustic measurements of the space i.e the reverberation time or RT60. Once this stage is complete we are able to put any make and model speaker (EASE has a data base made up of manufacturers' data on their speaker models) in any part of the space inside the room. We can then predict the performance of that speaker over the audience area. Whether that's the total sound pressure level (SPL) that the speaker will produce or more importantly the coverage the speaker will provide. This ensures the final design delivers the required SPL, has even coverage across the total audience area and maximizes speech intelligibility.

## A cross section of projects Matt Chapman from Audio workshop has designed

Auckland Cloud VIP Room

Dunedin Town Hall - Glenroy Room

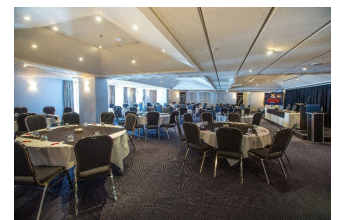

Taupo Lone Star

Freyberg Pool & Fitness Centre

City West Church - New Plymouth

James Cook Hotel

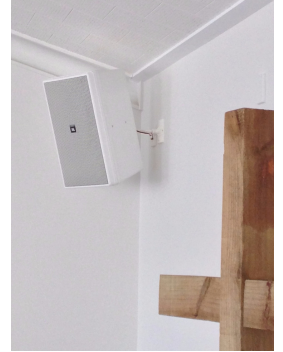

## Sound System Installation

Audio workshop offers a full range of installations to compliment our design service. Whether your job is big or small we pride ourselves on delivering a high level of service, attention to detail, delivering quality workmanship for your install. As part of the install process we will commission and tune your sound system so it delivers the best results in your environment. We can also provide full hand-over training to ensure you too can get the best out of your system and understand its functionality.

## Recent Design & Installs:

Australian High Commission

Salvation Army Church

Tawa College Auditorium

Cedar Wood Function Centre

## Audio Certifications:

Sound Reinforcement for Technicians - SynAudCon, USA  
 QSC Qsys level 1 Design - DSP Programming  
 Shure Axient Technical Certification - Shure Asia, Hong Kong  
 BSS Soundweb London Level 1 - DSP Programming  
 BSS Soundweb London Level 2 - DSP Programming

## What Clients Say about Audio Workshop:

"I would highly recommend Matt Chapman from Audio Workshop for any sound installation situation. I was very pleased to hear he was back working in the audio business as he is definitely one of the best in the industry.  
 In 2009 Matt designed sound systems for 6 spaces in our new facility, and this year when I needed to upgrade the sound system in our main auditorium Matt was the person I wanted to advise me and carry out the work. He is knowledgeable, measured, thorough and very easy to work with. The job was completed on budget, in a timely and tidy manner, and I am absolutely delighted with the end result".

- Murray Cameron - Tawa College
