

WHAT DO YOU LOOK FOR IN A QUALITY RADIATOR?

BETTER CONSTRUCTION = BETTER PERFORMANCE

A quality radiator will perform better and last longer than an inferior one.

	ANR	COMPETITOR

	ANR	COMPETITOR
Rubber Mounts Included	✓	X
Thicker Mounting Clips (Fan & Condenser)	✓	X
Proven in NZ & Australian conditions	✓	?
Comprehensive National Warranty	✓	?
Locally Supported since 1934	✓	X

A CAREFUL LOOK AT THE RADIATOR YOU BUY CAN REVEAL A LOT.

This ANR radiator has just 3 unfirmed bonds compared to the COMPETITOR radiator with 190!

Take a close look at where the fin and tube make contact...

Poor brazing causes defects in fin-to-tube bonding, reducing heat transfer and compromising overall radiator performance. These defects also drastically reduce structural integrity, shortening the service life of the radiator.

Many small differences between quality radiators and inferior ones combine to make a BIG DIFFERENCE to performance and service life. Take Good Care of your Customers and Fit Quality ANR Radiators.

More Reasons Why ANR is New Zealand’s No.1 Radiator Supplier!

Being a radiator manufacturer for over 75 years, ADRAD NATIONAL RADIATORS applies their knowledge & experience to build quality cooling products and to select the very best supplier partners from around the world.
